

## Cie EMERGENTE TECHNICAL RIDER « TEMPORARY IMBALANCE »

### PREAMBLE

The show is largely «physical». For a good representation, here are two rules to respect in an imperative way: during the summer season, avoid the hottest hours of the day and favor shady places.

**TO BE AVOIDED FOR EXAMPLE : CAR PARK IN FOOL SUN**

### PLAY AREA

- **A quiet place** with if possible in the background a wall, a building, a hedge, etc... The closed and intimate places are perfect. Do not hesitate to contact us before choosing the place. Pictures and plans are welcome.
- The dimensions of the play area are 5 meters deep and 8 meters wide. Free area in height: minimum 4 meters.
- The show can be performed on :
  1. **A flat and stable terrain.** It is possible to play on grassy ground, provided it is dry and flat. No sandy and too soft ground. The installation of a floor is possible. In this case, contact us please.
  2. **A stage :** It must be very stable and horizontal. The minimum dimensions are 8m x 5m. Provide a stage height adapted to the capacity of audience and a staircase on the face.
- The company vehicle will have access and will be able to park nearby if possible (especially if the weather is uncertain).
- **INSTALLATION & AUDIENCE :**  
The audience will be placed in a large semicircle in front of the playing area.
  1. First circle: audience sitting on the floor on carpets, mats, cushions or directly on grassy ground.
  2. Second circle: audience sitting on chairs, benches or bleachers.
  3. Third circle: standing audience (except for a high bleacher).**No maximum capacity of audience: it depends on the size of the circle and the number of seats on chairs or bleachers.**

### TECHNICAL

- An electric input **220V/16 Amps** in the background.
- Provide a sound system sufficient for the expected number of spectators with 2 loudspeakers, 2 stage monitor and 1 mixing desk (2 Microphone inputs XLR with 1 compressor, 2 Stereo line inputs).  
For small capacity under 300 people, we can provide a sound system and a mixing desk if we are here with the vehicle of the company. Please contact us.
- Provide a UHF Wireless System with a omnidirectional lavalier microphone ( not a headset microphone please).

If we are here with the vehicle of the company, we can provide an UHF Wireless System Sennheiser ew 100 G4-ME2 E-Band :

**Frequency 822-838 MHz 863-865 MHz. Be careful, check that this frequency is allowed in your country.**

- For night shows provide a simple full fire with spotlights in front, back and sides.  
For small capacity, we can provide a small light system if we are here with the vehicle of the company. Please contact us.
- **Installation and preparation time:** two hours of installation (including sound installation) if vehicle access is easy and one more hour of warmup before presentation.
- Uninstallation: one hour if vehicle access is easy.
- Duration of the show: 55 minutes
- Allow an hour between the end of the first show and the beginning of the second in case of second show during the day (same place of performance).
- **In case of rain**  
It is possible for you to provide a place indoor but it is imperative to take this decision early enough in order to respect the times of preparation of the show.  
**Minimum height of the place 4 meters.**
- In the event that several companies share the same play area, the installation and uninstalation can be done very quickly at first, then end on the sides of the play area.

**DRESSING ROOM :**

A dressing room with a shower, towel and soap, close to the paly area will be appreciated. In case of impossibility, the company vehicle can serve as a place of preparation. In this case provide a car place near the play area..  
It's noce to provide water, some fresh and dry fruit for the artist.

**PARK PLACE :**

Please provide accommodation with secure parking or a storage place for the equipment (about 3 m<sup>2</sup>).  
If the company arrives the day before the show, this place or this car park must be accessible even late in the evening.  
We travel with an OPEL VIVARO van registered CF 485 QW. Length 5 meters, width 2 meters and height 2 meters.

natural background : wall,building, hedge
